

Color Palette

Color Palettes are a way of storing a brush's color so that it can be used at a later time. This is useful when working with several colors at once.

Palette

A [Data-Block Menu](#) to select a palette.

New +

Adds the current brush's primary *Color* to the palette.

Delete -

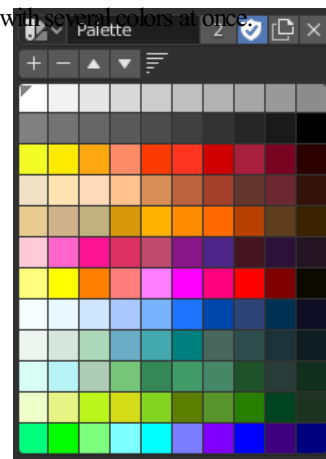

Removes the currently selected color from the palette.

Move (up/down arrow icon)

Moves the selected color up/down one position.

Sort

Sort Colors by Hue, Saturation, Value, Luminance.

Color Palette.

Color List

Each color that belongs to the palette is presented in a list. Clicking on a color will change the brush's primary *Color* to that color.

Shortcuts

- `Ctrl - LMB` open the color picker to change color. See [Color Picker](#).
- `Backspace` reset the value.
