Vertex of Corner Node

Outputs the index of the vertex that a face corner is attached to.

Inputs

Corner Index

The index of the face corner.

Note

If this input is not connected, it uses the [index](#) of the context item, which means it's important that the node is evaluated in the Face Corner domain.

Properties

This node has no properties.

Outputs

Vertex Index

The index of the vertex that the face corner is attached to.
