

[Skip to content](#)

Points Node

The *Points* node generate a point cloud with positions and radii defined by [fields](#).

Inputs

Count

The number of points to create.

Position

The position of each generated point.

Radius

The [radius](#) of each point.

Note

Since the point cloud is created from scratch, the *Position* and *Radius* inputs can only depend on the [index](#) node. Regular input nodes like the [position](#) won't work.

Properties

This node has no properties.

Outputs

Points

Standard geometry output.
