Index Switch Node

The *Index Switch* node outputs one of its inputs depending on an index value. Only the input that is passed through the node is computed.

See also

The [Menu Switch Node](#) is similar but it exposes the choices as a menu.

Inputs

Index

Determines which of the input options below will be passed through.

Item Inputs

One input is created for every menu entry. The input is used when the matching option is selected.

Properties

Type

Determines the type of the data that is handled by the node.

Outputs

Output

One of the inputs without any modifications.
