ID Property Access (idprop.types)

class idprop.types.IDPropertyArray

to_list()

Return the array as a list.

typecode

The type of the data in the array {'f': float, 'd': double, 'i': int, 'b': bool}.

class idprop.types.IDPropertyGroup

clear()

Clear all members from this group.

get(key, default=None)

Return the value for key, if it exists, else default.

items()

Iterate through the items in the dict; behaves like dictionary method items.

keys()

Return the keys associated with this group as a list of strings.

pop(key, default)

Remove an item from the group, returning a Python representation.

RAISES:

KeyError – When the item doesn't exist.

PARAMETERS:

- **key** (*str*) – Name of item to remove.
- **default** (*Any*) – Value to return when key isn't found, otherwise raise an exception.

to_dict()

Return a purely Python version of the group.

update(other)

Update key, values.

PARAMETERS:

other (`IDPropertyGroup` | dict[str, Any]) – Updates the values in the group with this.

values()

Return the values associated with this group.

name

The name of this Group.

class idprop.types.IDPropertyGroupIterItems

class idprop.types.IDPropertyGroupIterKeys

class idprop.types.IDPropertyGroupIterValues

class idprop.types.IDPropertyGroupViewItems

~~class idprop.types.IDPropertyGroupViewKeys~~

class idprop.types.**IDPropertyGroupViewKeys**

class idprop.types.**IDPropertyGroupViewValues**
