Gamma Cross Strip

The Gamma Cross transition is similar to the [Cross Strip](#) transition, however, the Gamma Cross strip transition uses color correction while transitioning between the two strips, resulting in a smoother transition that is easier on the eyes.

Options

Default Fade

Automatically calculates a linear fade over the length of the strip.

Effect Fader

Allows you to manually [keyframe](#) a custom fade. This can be used with different [easings](#) to fine-tune the fade in/out.
