

# Gizmogroup Operators

`bpy.ops.gizmogroup.gizmo_select(*, extend=False, deselect=False, toggle=False, deselect_all=False, select_passthrough=False)`

Select the currently highlighted gizmo

## PARAMETERS:

- **extend** (*boolean, (optional)*) – Extend, Extend selection instead of deselecting everything first
- **deselect** (*boolean, (optional)*) – Deselect, Remove from selection
- **toggle** (*boolean, (optional)*) – Toggle Selection, Toggle the selection
- **deselect\_all** (*boolean, (optional)*) – Deselect On Nothing, Deselect all when nothing under the cursor
- **select\_passthrough** (*boolean, (optional)*) – Only Select Unselected, Ignore the select action when the element is already selected

`bpy.ops.gizmogroup.gizmo_tweak()`

Tweak the active gizmo
