

RGB Node

The *RGB* node outputs the color value chosen with the color picker widget.

Tip

Dragging colors from a color picker button into a node editor creates a RGB node. Alpha values are preserved, if the source color has no alpha, a value of 1.0 is used.

Inputs

This node has no input sockets.

Properties

The RGB node uses the [color picker widget](#).

Outputs

Color / RGBA

A single RGBA color value.
