

# Nla Mode Blend Items

## REPLACE:

Replace.

The strip values replace the accumulated results by amount specified by influence.

## COMBINE:

Combine.

The strip values are combined with accumulated results by appropriately using addition, multiplication, or quaternion math, based on channel type.

## ADD:

Add.

Weighted result of strip is added to the accumulated results.

## SUBTRACT:

Subtract.

Weighted result of strip is removed from the accumulated results.

## MULTIPLY:

Multiply.

Weighted result of strip is multiplied with the accumulated results.
