Skip to content Curves Modifier (Strip Modifier)

```
base classes — bpy_struct, StripModifier
class bpy.types.CurvesModifier(StripModifier)
    RGB curves modifier for sequence strip
    curve mapping
        TYPE:
             CurveMapping, (readonly)
    classmethod bl rna get subclass(id, default=None)
        PARAMETERS:
             id (str) – The RNA type identifier.
        RETURNS:
             The RNA type or default when not found.
        RETURN TYPE:
             bpy.types.Struct subclass
    classmethod bl_rna_get_subclass_py(id, default=None)
        PARAMETERS:
             id (str) - The RNA type identifier.
        RETURNS:
             The class or default when not found.
        RETURN TYPE:
             type
```

Inherited Properties

bpy_struct.id_data
 StripModifier.name
 StripModifier.type
 StripModifier.mute
 StripModifier.mute
 StripModifier.input_mask_strip
 StripModifier.input_mask_id

Inherited Functions

• bpy_struct.keyframe_delete • bpy_struct.as_pointer • bpy struct.driver add • bpy struct.keyframe insert • bpy_struct.driver_remove • bpy_struct.keys • bpy struct.get • bpy struct.path from id • bpy struct.id properties clear • bpy struct.path resolve • bpy_struct.id_properties_ensure • bpy struct.pop • bpy_struct.id_properties_ui • bpy_struct.property_overridable_library_set • bpy struct.is property hidden • bpy struct.property unset • bpy struct.is property_overridable_library • bpy_struct.type_recast • bpy struct.is property readonly • bpy struct.values

- bpy_struct.is_property_set
- bpy_struct.items

- StripModifier.bl_rna_get_subclass
- StripModifier.bl_rna_get_subclass_py
