Skip to content Curve Display

Mode:

Edit Mode

Panel:

3D Viewport • Viewport Overlays • Curve Edit Mode

When in Edit Mode, curves have special overlays to control how curves are displayed in the 3D Viewport.

Handles

Controls the visibility of Bézier curve handles in edit mode.

None:

Hides all Bézier curve handles, providing an unobstructed view of the curve.

Selected:

Displays the handles only for selected control points.

All:

Displays the handles for all control points in the curve.
