Dot Dash Modifier

The *Dot Dash* modifier generates dot dash segments from the original stroke.

Options

Offset

Determines the starting offset of the pattern.

Segment

Makes up individual stroke of a dot dash pattern.

Use the plus/minus button on the side of the list to add/remove segments.

Dash

The number of consecutive points from the original stroke to include in this segment.

Gap

The number of points skipped after the segment ends.

Radius

The factor to apply to the original point's radius for the new points.

Opacity

The factor to apply to the original point's opacity for the new points.

Material Index

Use this index on generated segment, use -1 for existing material.

Use Cyclic

Close the segment.

The Dot Dash modifier.
