# Rotate Hair Curves

Rotates each hair curve around an axis.

Inputs

Geometry

Input Geometry (only curves will be affected).

Factor

Factor to influence the rotation angle.

Axis

Rotation Axis (Default: Tangent at root).

Angle

Angle of rotation.

Random Offset

Random offset to the rotation angle per Curve.

Lock Ends

Lock rotation to the axis between the curve ends.

Seed

Random Seed for the operation.

Properties

This node has no properties.

Outputs

Geometry
