Cross Strip

The *Cross* transition fades from one strip to another, also known as a crossfade. Strips can be overlapping or have a gap between them, however, when strips contain a gap the last and first frame of each strip is extend which can cause a pause if any of the strips are a sequence.
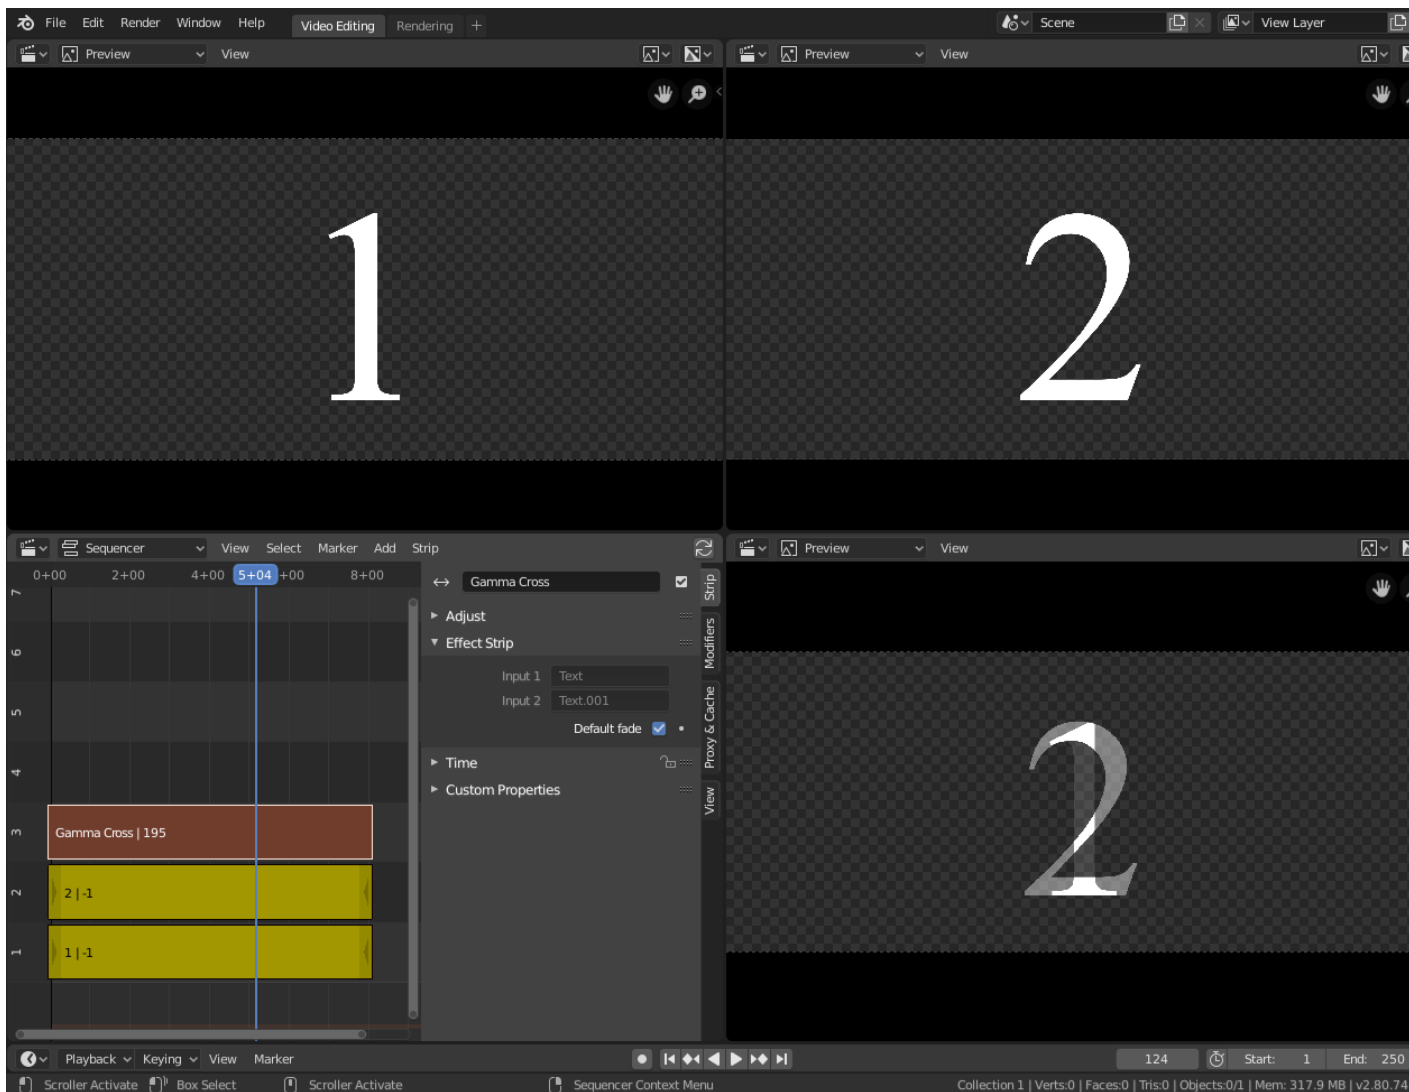

Options

Default Fade

Automatically calculates a linear fade over the length of the strip.

Effect Fader

Allows you to manually keyframe a custom fade. This can be used with different easings to fine-tune the fade in/out.

Example

Cross Effect.
